# WHY YOU SHOULD USE EXPANDED METAL WITH SKYLIGHTS

Expanded Metal Offers Solutions That Are  
Aesthetically Pleasing and Functionally Diverse

## SAFETY

Did you know that skylights must be covered to prevent workers from accidental falls?

Formed from a single sheet, expanded metal provides a high strength-to-weight ratio to help safeguard rooftop workers.

## PROTECTION

Did you know that hail storms cause approximately \$1 billion in damage each year?

Expanded metal made from corrosion-resistant materials protects against damage from hail.

## DECORATIVE

Did you know that expanded metal can be formed to complement existing architectural elements?

Over 50 customizable patterns and colors are available that go well with gutter guards, facades, and more.

**EXPANDED METAL FROM WALLNER EXPAC**  
Single Product, Multiple Applications
